

Louisiana/Mississippi Collaboration Required for EPSCoR Track-2 Proposals

Reminder: Full proposals are due on October 2, 2013. The RFP is available at:

<https://web.laregents.org/?p=3707>.

The list of Questions and Answers is available at: <https://web.laregents.org/?p=4021>. The last day to submit questions is September 20, 2013.

IMPORTANT NOTICE:

In reviewing questions submitted in response to the EPSCoR Research Infrastructure Improvement Track-2 Request for Proposals (RFP), it has come to our attention that some potential applicants are under the impression that single-investigator proposals can be submitted under this competition. This is not the case.

As noted in the RFP, only *“collaborative proposals from teams that **must** include investigators from both states”* are being solicited from consortiums that can *“collaboratively undertake a project that shows that the consortium is well-positioned to produce project results that cannot be obtained by any single partner working independently.”*

Proposals from single investigators, or those that involve investigators from only one state will be returned without review.
