Consortium for Innovation in Manufacturing and Materials (CIMM) Seed Funding

Track 2: Industrial Collaborations

FY 18-19 Request for Proposals

DEADLINE DATES:

RFP ISSUE DATE: (October 31, 2018)

Last day for questions and answers about this RFP: (December 28, 2018)

Proposals due: (January 28, 2019, 4:30 PM Central Time)

LOUISIANA ESTABLISHED PROGRAM TO STIMULATE COMPETITIVE RESEARCH (EPSCoR)

Supported by:

The National Science Foundation and the Louisiana Board of Regents

1201 North Third Street, Suite 6-200 Baton Rouge, Louisiana 70802 (225) 342-4253 www.laregents.org Introduction: The Consortium for Innovation in Manufacturing and Materials (CIMM), an NSF EPSCoR RII Track-1 project, solicits proposals for CIMM Seed Funding Track 2: Industrial Collaborations to support research projects in partnership with industry. The current Science and Technology Thrusts (STTs) of CIMM address underlying technologies in two areas: 1) STT1 (Multiscale metal forming and replication) addresses challenges in high-throughput manufacturing of components with functional features ranging from microns to millimeters and beyond with high fidelity and repeatability; 2) STT2 (Laser-based 3D metal printing) focuses on adaptive manufacturing of application-specific structures with a high degree of geometric and microstructural complexity and variability. The unifying scientific challenge for these STTs is the multiscale nature of the underlying phenomena, which span multiple length scales (nanometers to millimeters and beyond) and time scales (nanoseconds to hours). A major challenge in multiscale forming is that well-established macroscale manufacturing methods cannot be simply scaled down to the relevant dimensions. To address this, STT1 tightly couples experimentation with modelling and simulation on multiscale plasticity and physics and mechanics of interfacial regions, with focus on mechanical size effects and engineered interfaces. A major challenge in laser-based 3D metal printing is that an understanding of the complex interplay between multiphysics and multiscale phenomena—which are required for tailoring composition and microstructure of printed parts—is presently incomplete. To address this, STT2 couples experimentation with hierarchical modeling and simulation tools, with a focus on laser printing processes and custom powder synthesis. Experimentally validated models and simulation tools, developed through this effort, will lead to advancement of scientific understanding and acceleration of further technology development. CIMM's research program also includes the development of data handling and workflow management capabilities to support material and process development within the Integrated Computational Materials Engineering (ICME) framework. CIMM has established an ecosystem of User Facilities at LSU and Louisiana Tech to support advanced manufacturing research and development, and is expanding this network of user facilities where CIMM-affiliated users are given access at the same rates charged to the oncampus users. Collectively, these are called CIMM Core User Facilities (CIMM-CUF). Additional information about CIMM can be found at http://www.lsu.edu/eng/cimm/index.php.

Eligibility Guidelines

Individuals who hold a regular tenured or tenure-track or research professors position at any Louisiana public institution of higher education, or at any Louisiana higher education institution that is a member of the Louisiana Association of Independent Colleges and Universities, are eligible to apply. Pls who are currently funded by CIMM are also eligible to apply. Seed awards are to be single-investigator. While co-Pls are allowable, one and only one individual must be listed on the cover sheet as principal investigator.

Award Information

- 1. Should be primarily industry driven
- 2. Must have partnership with industry
- 3. Must have a designated industry mentor/partner
- 4. Letter of support from industry is required. The letter should identify the industry and individual mentor/partner and describe any pertinent commitments, either cash or in-kind contribution (personnel time, use of existing equipment or facilities, etc.)
- 5. Participation from women and under-represented minorities (URM), including graduate students, is encouraged.
- 6. Preference will be given to industries with a presence inside Louisiana

The Seed Funding Track 2: Industrial Collaborations program will be administered through the BoR's Office of Sponsored Programs and will operate under the guidance of the State's EPSCoR

Committee. The awards are anticipated to be \$10,000. Charges for tuition and senior personnel salaries (faculty, postdoctoral researchers, or research associates) are not allowable expenses. Award dollars may be used, for example, to support students, travel, and the purchase of scientific equipment and supplies. Any scientific equipment requested must have a strong justification included in the project description. Cost sharing is not required, but industry contributions (see item 4 in the Award Information section on the previous page) may be a consideration in proposal evaluation. Funds will be made available by contract from the BoR to the Principal Investigator's (PI) institution. Institutions are strongly encouraged to waive the F&A on these awards so as to maximize the impact of the seed grants.

Award Conditions

Successful applicant is expected to participate fully in the activities of CIMM including providing materials needed for reports, contributing data to the CIMM ICME hub, participation in CIMM meetings (two meetings per year in Baton Rouge; anticipated to be in April and July), responding to data collection requests by the CIMM External Evaluator, and reviews by the CIMM External Review Board. All publications and presentations resulting from the seed grant should acknowledge support from NSF EPSCoR RII Track-1 Co-operative Agreement OIA-1541079 and Louisiana Board of Regents.

Schedule

Request for Proposals Released

Last Day for Q&A

Proposals Due

Award Notification

October 31, 2018

December 28, 2018

January 28, 2019

February 15, 2019

Project Dates April 1, 2019 – March 30, 2020

Proposal Format

Proposals must use 1 inch margins, 11-point font or larger (Arial or Helvetica) and single line spacing. The following outline is to be followed:

- Title page (Please use the one provided with this RFP)
- NSF demographic survey (please use the form provided with this RFP) Note: this information is voluntary.
- Proposed Research (2 pages max)
 - Rationale: discussion of the technical background and engineering/scientific justification. This should include project objectives and how it will advance the goals of CIMM and industry.
 - Research Plan: What exactly will be done? How will the objectives be met? What are the motivations, methods, likely outcomes, milestones, and future directions?
- Synergism, Diversity, and Sustainability (1 page max):
 - Synergism: How will the Seed project take advantage of the capabilities of others in the CIMM and industry? What specific collaboration with industry will be used to meet the project goals?
 - Describe the involvement women and/or URM in the project.
 - Will the project result in a long-term partnership with industry that will sustain the project after the funding period has expired?
- References (not included in the page count)
- Budget (Please use the form provided). A one-page budget justification/explanation must also be included. Describe any industry commitment of cash or in-kind resources in the budget narrative under the appropriate category.
- Biosketch (2 page limit; use NSF format)
- Letter of support from industry

Proposal Submission

The proposal must be submitted to the Board of Regents by the submitting institution's authorized representative no later than the close of business (4:30 p.m.) Monday, January 28, 2019. All online submissions must be uploaded as a **single PDF document** through the LOGAN system. Proposal submission is a two-step process. Following PI submission, the proposal is routed to your employing institution for review, approval, and final submission to the Board of Regents' EPSCoR office; the Board does not receive and will not accept the proposal directly from the PI. Deadlines listed in the RFP are absolute; all approved proposals must be submitted by the campus and received by the Board on or before the published proposal deadline. The proposal submission system will automatically close at 4:30 p.m. Central on the deadline date.

Instructions for PIs:

- Go to URL: https://web.laregents.org/logan/index.pl
- Login using your LOGAN credentials.
- If you are new user and do not have a LOGAN login, please click on "New user registration" to register.
- If you have logged into LOGAN before and have forgotten your credentials please click "Forgot your password? Reset your account and receive a new system assigned password" to receive a new system-assigned password.
- After logging in, click on "Go >>" next to "CIMM Seed Funding Track 2".
- Follow on-screen instructions to complete your proposal.
- Send completed proposal to the appropriate campus office by clicking "Send Proposal to OSP/OSR". A proposal reference number will be assigned after the proposal is successfully sent to the PI's Office of Sponsored Programs/Research.
- An email confirmation of submission to the campus will be sent to the PI with the proposal reference number.
- The OSP/OSR will review the proposal, and, if approved, submit the proposal to the Board of Regents.

Instructions for the OSP/OSR:

- Go to URL: https://web.laregents.org/logan/index.pl
- Login using your Institutional credentials.
- Select "CIMM Seed Funding Track 2".
- Follow on-screen instructions to submit the proposal to the Board of Regents' EPSCoR office.
- An email will be sent to both the PI and OSP/OSR to confirm successful submission of the proposal to the EPSCoR office.

If both the PI and the OSP/OSR do not receive confirmation emails within 4 hours, the proposal was not received. Please contact the LA EPSCoR office by phone at 225-342-4253 or by email at support@laregents.org.

Evaluation Criteria

- Potential for short- and long-term impact on advanced manufacturing.
- Potential to seed unique directions within CIMM to advance the two STTs.
- Collaboration with industry, including (optional) commitment of industry resources.
- Potential for long-term partnership with industry
- Collaborations with CIMM senior investigators.
- Involvement of women and under-represented minorities in research.

Specific questions concerning this RFP and the requirements set forth herein should be directed in writing to Ms. Jessica Patton, Federal Programs Administrator, by sending an email message to iessica.patton@la.gov. Questions will be accepted and answered through December 28, 2018. A running compilation of all questions asked about this RFP and all answers provided in response to those questions will be periodically posted on the BoR website at http://web.laregents.org.

PI Rank: Assistant	Professor ☐ Associate Pr	rofessor □ Full Professor □
Industry Partner:	Nan	ne and position of Industry Mentor:
2. Project Title:		•
•		
3. Project Sumr	mary (250 words max):	

4. Acceptance of Program Requirements: By submitting my proposal electronically, I agree that I have read and understand the program requirements detailed in this RFP under Award Conditions. If awarded, I agree to ensure timely compliance to all program requirements.

PROSPECTIVE REVIEWERS:

Provide the name, title, affiliation, mailing address, telephone number, and <u>e-mail address</u> for at least three out-of-state scholars <u>from the U.S.</u> in the specific field of your proposal who are qualified to evaluate your application and/or who can recommend other individuals who are qualified to evaluate your proposal.

Conflict of Interest Criteria:

Reviewers cannot 1) have been a Louisiana faculty member during the previous five years; 2) have collaborated on a publication, funded project, or as a paid consultant with the applicant during the past five years; 3) have supervised the master's thesis, doctoral candidacy, or post-doctoral work of the applicant, or 4) be affiliated with institutions where the applicant was a student or previously employed.

2019 CIMM Seed Grants (Complete one form for each project participant)

For National Science Foundation Reporting Purposes Only								
Gender:	Male Female							
Ethnicity: (Choose one response) or Latino	Hispanic or LatinoNot Hispanic							
Race: (Select one or more)								
Asian	American Indian or Alaska Native							
Black or African American	_ Native Hawaiian or Other Pacific Islander							
White Prefer not to respond								
Disability Status:								
Hearing Impairment Mobility/Orthopedic Impairment								
Visual Impairment	Other None							
Prefer not to respond								

Why this information is being requested:

The National Science Foundation (NSF) is committed to providing equal opportunities for participation in its programs and promoting the full use of the Nation's research resources. To aid in meeting these objectives, NSF requests information on the gender, race, ethnicity and disability status of individuals participating in NSF-sponsored activities. Provision of this information is voluntary.

The above information will be used for NSF reporting purposes only and will not be considered as a precondition of a CIMM Seed Funding award.
